Presentations and Videos

- We will email you about making slides and video talks available
- Please say yes!

Contribute to KLEE!

Most techniques compare with “baseline” KLEE

- But little attention is given to how these approaches combine
- I wish the gains were multiplicative!
- (see Rizzi, Elbaum, Dwyer, “On the Techniques We Create, the Tools We Build, and Their Misalignments: A Study of KLEE”, ICSE 2016)

Can we do better?

- Contribute the techniques to the KLEE mainline
 - An achievement in itself, as the barrier for successful integration is high
 - Your technique won't be forgotten
 - New techniques could compare with your technique too

Maintaining open-source research projects

- (Somewhat) misaligned incentives
- Academia:
 - Encourage artifacts and artifact evolution
- (National) funding bodies
 - Encourage maintenance and evolution of research tools
- Industry
 - Encourage research artifacts by publicizing them, sharing your experiences
 - Support funding applications, and fund research into such projects

Participants

A close-up photograph of a hand holding a silver fountain pen, writing the words "Thank You!" in a black, elegant cursive script on a white surface. The pen is positioned at the end of the word "You", and the exclamation point is already written. The background is softly blurred, showing a white surface and a hint of a yellow object, possibly a highlighter or another pen.

And see you next time!

3rd International KLEE Workshop on Symbolic Execution

15–16 September 2022 • London, UK and Online
